

## Installing and Setup Quick Manual for the PUSH solution

The following procedures illustrate the method to install Mofinity's PUSH client software.

Window Mobile OS installation guide:

1. Insert the install CD into the CD ROM. Select the file with filename "MOSClient.msi".
2. Ensure that ActiveSync is installed on the PC. If not, download ActiveSync from <http://www.microsoft.com/windowsmobile/downloads/activesync41.mspx> and follow its instructions for installation
3. Link the connection between Pocket PC and the desktop PC
4. The next step is to install the MOSClient software. Double click the "MOSClient.msi" icon on PC to start the installation
5. Note that to install the software, the PC needs .NET Framework version 2.0 Redistributable Package. If your PC does not already have it, a window will pop up. Click "Yes" to get to its download page:  
<http://msdn.microsoft.com/netframework/downloads/updates/default.aspx>.  
Select the .NET Framework version 2.0 Redistributable Package x 86 version.
6. Double click on icon for software MOSClient to start installation for PUSH. Follow the procedure to complete the installation.

## Registering

1. When you open MOSClient for the first time, you would have to register your information. The UserId and Userkey are provided on a card along with the MOSClient disc. The password is free for you to choose, and the email is through which your password can be sent to you in case you forget it. Then the Server should be automatically entered in. If not, enter it as 202.94.236.201:3333 or hk.mofinity.com:3333. After ensuring everything is correctly filled in, "Register".
2. Go to "Account Settings" via Menu to enter your mail account information. You can setup up to four email accounts. The Username, Password, Email, and Mail Server should match that of your existing mail account. For example: (Email address: abc@yahoo.com.hk; Username: abc; password: xxxxxx; Mail Server: pop.mail.yahoo.com). Ask your system administrator or ISP should you have any problem on Mail Server setting. You may also refer to your Outlook Express Incoming Mail setting in "Tools->Account->Mail->(your mail account)->properties->servers->incoming mail"
3. To change your forget password reminding email address or check your account information, please visit <http://www.e2sms.com/moffice/>. Login with your user id and password.
4. For any query, please visit <http://www.mofinity.com> or contact our customer representative (info@mofinity.com).
